

EXPLANATION OF A STANDARD DIAPER ROLL

Before you “dive” into your Diaper Panda, please let me show you one of the main diaper rolls that you will need to know before you can go too far. The **standard diaper roll** is used for “fillers” inside of the panda, as well as the arms and legs. Please pay close attention to the pictures, they can be very helpful.

The Standard Roll:

This will be done with various sizes of diapers.

A. Lay one diaper vertically on a sturdy & clean flat surface in front of you with the open end of the diaper at the top.

B. Pull the top flap of the diaper downward, approximately one inch from the top and smooth out.

C. Start rolling the diaper from the bottom to top as tight as possible until you run out of diaper. Wrap 2 elastic bands around it to hold it in place, one at the top & one at the bottom.

Complete Diaper Panda Instructions:

1. The Body:

A. Take 6 size FOUR diapers. Using the previous standard roll instructions. Roll them each into a standard rolled diaper, securing them with elastic bands.
